

2023 Annual Report

The Next Transition

There aren't words that can fully describe what it's been like to lead and serve this Coalition for the last 9 years. I can certainly say it's never been boring or easy or simple! Not one day has been exactly the same as the one that came before it. We have seen major shifts in the not only the politics, social systems and security situation in Haiti - but also day-to-day life. What constitutes "normal" has changed dramatically.

The opportunity to learn and partner in the midst of all this turmoil has been humbling. These last few years have been inspirational and maddening, all at the same time. Together we've kept our clinic doors open - providing life-saving healthcare to patients despite their ability to pay. We've trained Haitian principals and teachers to transform children's lives through quality education. We've equipped community leaders to be changemakers for the Haiti they dream of. This Annual Report summarizes what you helped make possible in 2023 - [thank you](#).

During the first half of 2024, I will be transitioning to a new position that will take me away from CCH. I'm confident that by working together, we'll navigate this change just like all the others - with creativity, thoughtfulness and the understanding that this ministry is so much bigger than any one of us. We'll keep you updated as we progress and would certainly appreciate your prayers.

Clark CCH Executive Director, Clark Seipt

530

530 hygiene kits distributed to school students, in conjunction with lessons from school nurses

3,471

There are 3,471 students and 171 teachers in 11 schools that partner with CCH - all benefit from teacher trainings and CCH resources

CCH Clinics provided over 17,000 patient consultations (9,950 in Primary Care and 7,080 in Physical Therapy)

17,030

In partnership with the Haiti Response Coalition, 1,000 households received cash assistance for earthquake recovery.

1,000

CCH operates the one and only Physical Therapy Clinic in Jacmel, Haiti - serving a population of approximately 340,000 people.

1

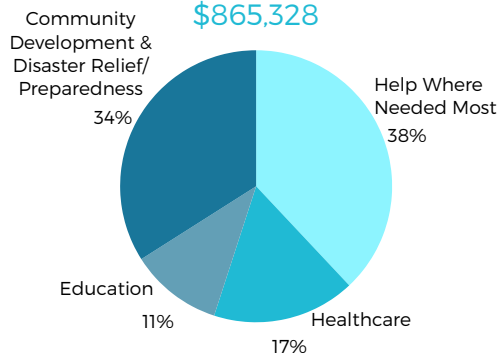

446

446 children received free dental check ups and fluoride treatments at CCH partner schools. 104 were identified to receive follow up care.

Financial Insights

2023 was another year with soaring inflation and many hardships in Haiti. The solar panels that CCH installed previously at the Clinics and Program Center continue to be a prudent investment. With gasoline hard to find, having alternative electrical power has been key to CCH's success. We give thanks that the Primary Care and PT Rehab Clinics were open every day as scheduled in 2023!

Revenue
\$865,328

* These financial figures are not yet audited.

Impacts

- **127** teachers trained at CCH seminars
- **Thousands** of patients treated at CCH healthcare clinics
- **67** community leaders trained at CCH seminars on agriculture & leadership
- **602** kids fed lunch each school day
- **530** kids seen by doctors for health check ups at their school
- **170** kids attended summer camp
- **2** nurses trained to start vaccinations

Here are the top 3 things you helped accomplish!

1

CCH Primary Care and Physical Therapy **Clinics stayed open** to treat patients even during protests and supply shortages. Patient consultations increased by 6% in 2023 even though patients faced greater obstacles getting to our clinics.

2

A new community partner joined CCH to improve sanitation. **15 latrines were built** in partnership with leaders in Savanne du Bois. This improves health for the 16,625 residents there.

3

CCH laid the groundwork for **expanding services** in healthcare (vaccinations & dentistry) and education (increasing the number of teacher trainers). Services will continue to expand in 2024.

“The lesson I learned in 2023 is: Don’t be afraid to try a new thing - even if it makes you uncomfortable at first.”

- Lourdemie Eugene, CCH Clinic Coordinator

Healthcare

Our staff go above and beyond for the people we serve. One patient showed up at the Primary Care Clinic out of breath, needing an inhaler. She was in tears when we didn't have the medicine she needed. Clinic Coordinator, Lourdemie Eugene sent her home on a moto taxi and then started making calls. A few hours later, Lourdemie delivered the medicine (with a hug) to the patient's house.

Education

Kristen Haynor (left) is a Neurodiversity Specialist volunteering remotely with CCH partner schools. Haitian teachers consistently request professional development on how to identify atypical learners and adapt their classroom environment to individual student needs. “The way [Principal Mariline Francois] (middle) carries herself allows you to meet her at that level. It makes you better at your own work,” says Kristen.

Community Development

CCH hosted 3 Community Development trainings in 2023. One farming co-op president said, “The training we had on project development led us to start a little project with the group on producing millet. Another CCH training on how to evaluate projects helped us get more people involved and grow more millet. Thank you so much CCH! You always make what's best for us your priority!”
